

TRANSITION GROUP PROGRAMME

2018 | 2019

Stepping Stones to the Future

This programme focuses on the changing role of the workplace and workplace management. Exploring how they have evolved into critical business tools that are instrumental to organisational success.

The programme will help leaders in **CRE, FM, HR** and **IT** to evaluate their own organisation's management of the workplace – and through 8 workshops (4 per year over 2 years) will deliver strategies, tactical approaches, tools and techniques at the forefront of workplace management thinking.

Workshops will feature insightful case studies and contributions from leading experts working on the forefront of new workplace developments.

2018 Schedule

The Evolution to True Workplace Management

Mar

We will consider what the next generation workplace will deliver, what new workplace management practices are required and how to manage 'experiences' in a rapidly changing business world. We'll provide you with a framework and process for developing and enhancing your organisation. A modern workplace should be delivering significant organisational benefits and competitive advantage – but to do so, the management of the workplace needs to be front and centre – not in the background as a cost absorbing "necessary evil".

The Dream Team - CRE, FM, HR & IT Working to a Shared Vision

Jun

Delivering superior workplace performance requires these once solitary functions to be integrated and work cohesively. We'll explore the different objectives, personalities and languages involved in each operation and we will provide tools and templates to unify the endeavors of all working to deliver the workplace experience. The session will explore insights from experts and share a process for unifying the disciplines to create a shared workplace experience vision.

A Practical Process for Designing Workplace Experiences

Sep

There is much talk in the press about 'workplace experiences' but how do you go about designing an experience that involves every sense, emotion, functionality and involves a multitude of disciplines? At AWA we've been evolving and developing an exciting approach to designing workplace experiences, aligning to business drivers, personalities and priorities. We'll work through various case study examples with an experiential approach, to provide practical takeaways for everyone to implement in their own organisation.

Using Technology to Improve the Performance of the Modern Workplace

Nov

The Internet of Things (IOT), Artificial Intelligence (AI) and Big Data provide us with new tools to manage the workplace - but how will we use them? In our session we'll de-bunk the technology and explore what we are seeking to achieve along with the solutions and data you **actually** need (*rather than what the manufacturers want you to have*). Loaded with new case studies and fresh eyes, this session will reveal the dos and don'ts of new workplace technologies.

2019 Schedule

The Neuroscience of Knowledge Work - Managing the Workplace Beyond Buildings

Mar

In the world of knowledge work, the human brain is the most important tool we bring to work everyday. This session will reveal the way in which the brain works and what you need to do to maximise its performance and the implications for those designing and managing the workplace experience.

Managing Complex Multi-disciplinary Workplace Change

Jun

Changing workplace practices, behaviours and processes whilst business is in full flow is a challenge for all businesses. In the session we will talk about the skills, tone, practices and techniques for achieving large scale workplace transformation.

Workplace Performance Management

Sep

Managing workplace performance is a multi-dimensional subject. Our goal is to maximise the performance of each individual and community whilst being economically responsible. In this session we will explore techniques for measuring human and workplace productivity, efficiency and utilisation.

Managing Modern Workplace Capacity

Nov

This session will explore what capacity is, the factors that govern it, the way to calculate it and mechanisms to understand how much of your workplace capacity has been consumed. We'll then ask and explore "What is the capacity of the modern workplace?" - in the traditional world, the capacity of the workplace was equivalent to the number of desks that could be provided. In the mobile workplace, this is no longer true.

Membership of the PIN Transition Group is £2,500 + VAT per annum.
This enables 2 people to attend each workshop.

All attendees receive a CPD certificate of attendance after each workshop

AWA's Workplace PIN provides services to help inspired leaders change the world of work, workplace and workplace management.

Coaching We provide 1:1 and group coaching sessions to help leaders and their teams develop their skills to meet the challenges of the future.

The CUBE is a peer to peer workplace performance benchmarking group.

Sector Groups are facilitated 'invitation only' quarterly discussion groups for senior leaders responsible for the workplace in specific industry sectors.

Agile Working Bootcamp
A 2 day intensive training workshop designed to prepare in-house workplace leaders for the complex journey to agile / activity based working.

Explorer Groups
Undertakes evidential research, bridging the worlds of work, place and academia on topics relevant to members. Providing evidence backed guidelines and practical tools.

Transition Group
An 'occupier only' membership group for leaders who want to optimise the performance of the workplace and deliver maximum value to their organisation. Four workshops a year featuring key topics, insightful case studies and networking / sharing opportunities.
