

2030 VISIONS PROGRAMME

2030 Visions Programme

The **2030 Visions Programme** is a two-year enquiry into life, business, work and place in 2030.

Designed for senior leaders responsible for their organisations work, *workforce* and workplace infrastructure strategies. The programme provides analysis, insights, data and processes to aid decision making and enhance strategic contribution.

Many commentators predict that the next 10 years will see some of the most profound social, economic and technological changes seen in any decade. Many of which will have 'game changing' implications for the nature of work, place, location and real estate.

The 2030 Visions Programme provides expert insights and analysis to enable effective navigation of the choppy waters towards 2030.

Research

To add to the AWI's '2030 body of knowledge', vital workplace consumer research is being undertaken to determine the attitudes, ideas and needs of knowledge workers in 2030. Results will be provided exclusively to members at the AWI Leader Forums.

Leaders Forums

Leader Forums (12 over 2 years) in London and New York involving leading experts from the worlds of economics, business, technology, AI, workforce trends, sustainability, education and workplace management will provide a confidential environment in which to explore the world in 2030.

Delivered in an informal dinner format, attendees have the opportunity to discuss and debate the topics openly and confidentially with our experts under 'Chatham House rules'. We'll be asking, 'what does this mean for life, work and place?'

2030 Knowledge sharing

A series of 'Guides to 2030' will be published for use by AWI members within their organisations along with planning tools and processes all geared to equipping leaders with the best available intelligence with which to inform their workplace strategies.
